Packing content: 20 pcs of Actinic UVA LEDtube EM/Mains T8 Secura (*)

The Actinic UVA LEDtube is specifically designed for insect trap applications and can serve as a replacement for the Philips Actinic BL TL-D (T8) fluorescent lamp. However, it may not be suitable for all applications that use traditional visible fluorescent lamps due to its narrower temperature range.

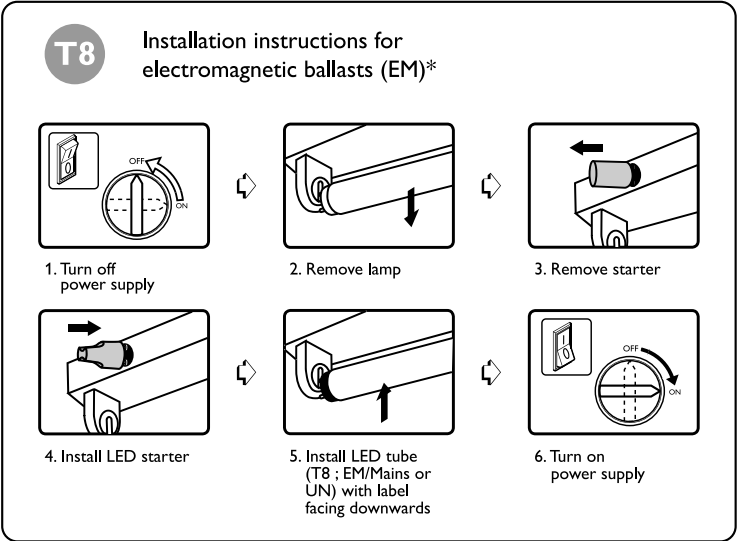

If you have any doubts about the suitability of this LEDtube for your application, please contact Signify for assistance.

(*) The packing does not include Master LEDtube EM/Mains starter

The **Philips Actinic UVA LEDtube EM/Mains T8 Secura** can be installed in a luminaire designed for one or two fluorescent lamps working with electromagnetic (EM) ballast. LED starter from type **MASTER LEDtube EM/Mains**, which can be purchased separately, is necessary for the installation.

Luminaires operating on existing EM ballasts do not require internal wiring modification.
