

New UV Master series

Energy saving at high UV efficiency.

Stimulates the production of vitamin D3 of reptiles, mammals, birds.

Dust tight rugged devices made of high quality die-cast aluminum, protection type I, impact resistance IK08, suitable for high humidity IP65/IP66.

Daylight version produces UV-radiation and high-quality light for illumination at the same time.

Easy replacement of UV lamps.

Adaptable to different working distances by simple change of reflector.

Long service life.
